This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1 (previously presented): In a computer system having a user interface, including a display and a selection device, a method of displaying an electronic document, the method comprising the steps of:

      displaying at least a portion of the electronic document to a user as an immersive reading page, the immersive reading page mimicking a printed paper page;

      associating navigational functionality with a page number of the immersive reading page, the page number having a corresponding interactive region that includes only a portion of the immersive reading page; and

      displaying another immersive reading page of the electronic document in response to the user selecting the interactive region corresponding to the page number of the immersive reading page, wherein

      the navigational functionality associated with the page number is transparent to the user prior to the user selecting the interactive region corresponding to the page number of the immersive reading page.

Claims 2-3 (canceled)

4 (original): The method of claim 1, further comprising the step of invoking a training mode for teaching the association to a user.

Claims 5-8 (canceled)

9 (previously presented): A computer-readable medium having stored thereon computer-executable instructions for performing a method of displaying an electronic document, the method comprising the steps of:

      displaying at least a portion of the electronic document to a user as an immersive reading page, the immersive reading page mimicking a printed paper page;

associating navigational functionality with a page number of the immersive reading page, the page number having a corresponding interactive region that includes only a portion of the immersive reading page; and

displaying another immersive reading page of the electronic document in response to the user selecting the interactive region corresponding to the page number of the immersive reading page, wherein

the navigational functionality associated with the page number is transparent to the user prior to the user selecting the interactive region corresponding to the page number of the immersive reading page.

Claims 10-11 (canceled)

12 (previously presented): The computer-readable medium of claim 9 having stored thereon computer-executable instructions, for performing the step of invoking a training mode for teaching the association to a user.

Claims 13-21 (canceled)

22 (previously presented): The method of claim 1, wherein the electronic document is a book in electronic form and the immersive reading page mimics a printed paper page of a book.

Claims 23-26 [including duplicate claim 24] (canceled)

27 (previously presented): The computer-readable medium of claim 9, wherein the electronic document is a book in electronic form and the immersive reading page mimics a printed paper page of a book.

Claim 28 (canceled)

29 (previously presented): The method of claim 1, wherein the displaying includes displaying only one immersive reading page at a time.

30 (previously presented): The method of claim 1, further including teaching the association to the user by providing audio indicators.

31 (previously presented): The computer-readable medium of claim 9 having stored thereon computer-executable instructions, wherein the step of displaying includes displaying only one immersive reading page at a time.

32 (previously presented): The computer-readable medium of claim 9 having stored thereon computer-executable instructions, for performing the step of teaching the association to the user by providing audio indicators.

33 (previously presented): In a computer system having a user interface, including a display and a selection device, a method of displaying an electronic document, the method comprising the steps of:

     displaying at least a portion of the electronic document to a user as an immersive reading page, the immersive reading page mimicking a printed paper page;

     associating navigational functionality with an element of the immersive reading page, the element having a corresponding interactive region that includes only a portion of the immersive reading page; and

     displaying another immersive reading page of the electronic document in response to the user selecting the interactive region corresponding to the element of the immersive reading page, wherein

     the navigational functionality associated with the element is transparent to the user prior to the user selecting the interactive region corresponding to the element of the immersive reading page.

34 (previously presented): A computer readable medium having computer-executable instructions stored thereon for performing the method of claim 33.

35 (currently amended): The method of claim 1, further including associating functionality with an element of the immersive reading page, the element, being different than the page number, and having a corresponding interactive region, and the functionality being different from the navigation functionality associated with the page number.

36 (previously presented): The method of claim 35, wherein the element is a title.

37 (currently amended): The computer-readable medium of claim 9 having stored thereon computer-executable instructions, for performing the step of associating functionality with an element of the immersive reading page, the element, being different than the page number, and having a corresponding interactive region, and the functionality being different from the navigation functionality associated with the page number.

38 (previously presented): The computer-readable medium of claim 37, wherein the element is a title.

39 (previously presented): The method of claim 33, further including associating functionality with a second element of the immersive reading page, the second element having a corresponding interactive region, the functionality being different from the navigation functionality associated with the element.

40 (previously presented): The method of claim 39, wherein the second element is a title.

41 (previously presented): The computer-readable-medium of claim 9, wherein the user selecting the interactive region is tapping the corresponding interactive region.

42 (previously presented): The computer-readable medium of claim 41, wherein the interactive region corresponding to the page number includes an area to the right of the page number and an area to the left of the page number, and wherein the step of displaying includes displaying a previous page of the electronic document in response to the user tapping the area to the left of the

Shortcut to Internet Explorer.lnk   page number and displaying a subsequent page of the electronic document in response to the user tapping the area to the right of the page number.

43 (previously presented): The computer-readable medium of claim 9, wherein the interactive region constitutes the page number.

44 (previously presented): The computer-readable medium of claim 9, wherein the interactive region constitutes areas in an immediate vicinity of the page number.

45 (previously presented): The computer-readable medium of claim 9, wherein the interactive region constitutes the page number and areas in the immediate vicinity of the page number.

46 (previously presented): The computer-readable medium of claim 9, wherein the interactive region corresponding to the page number includes an area to the right of the page number and an area to the left of the page number, and wherein the step of displaying includes displaying a previous page of the electronic document in response to the user selecting the area to the left of the page number and displaying a subsequent page of the electronic document in response to the user selecting the area to the right of the page number.

47 (previously presented): The method of claim 33, wherein the interactive region constitutes areas in an immediate vicinity of the element.

48 (previously presented): The method of claim 33, wherein the interactive region constitutes the element and areas in the immediate vicinity of the page number.

49 (previously presented): The method of claim 33, wherein the interactive region corresponding to the element includes an area to the right of the element and an area to the left of the element, and wherein the step of displaying includes displaying a previous page of the electronic document in response to the user selecting the area to the left of the element and displaying a subsequent page of the electronic document in response to the user selecting the area to the right of the element.
